

INDUSTRY PRACTICES COMMITTEE

The Industry Practices Committee has continued to be an extremely active committee throughout 2006. This year the committee focussed on a Bidding & Tendering Tip Sheet and discussed the probable consequences of the Kennedy Electric issue. The upcoming year will focus on initiatives such as:

- Managing Risk Tip Sheet
- Kennedy Electric
- Arbitration and Mediation and whether or not TCA should be involved and in what form.

The Industry Practices Committee continues to encourage all members of the construction process to govern themselves in accordance with best business practices to ensure that we are all partners in profit.

The committee would like to thank the TCA staff for their continued hard work and support.

Members of the Industry Practices Committee are:
