EDUCATION AND THE CONSTRUCTION INSTITUTE OF CANADA (TCIC)

TCA offers several avenues for ongoing professional development through our educational arm, The Construction Institute of Canada (TCIC). For over a decade, TCIC has provided opportunities

for industry practitioners to advance their knowledge, upgrade their skills, and collaboratively work to achieve the highest standards of industry professionalism. TCIC is the only organization in Canada outside of a college or university to assemble courses into a logical pathway (by stakeholder group) that will lead your employees toward an overall goal of success in life-long learning — all of our course offerings are by the industry and for the industry!

ON-SITE TRAINING

Better yet, we are able to provide on-site training that is specifically customized to fit your business needs. Consider our group of knowledgeable industry experts your edge when it comes to delivering ongoing training to your team of construction professionals.

You can choose from a variety of pre-packaged courses offered as part of our professional development pathways (organized by stakeholder group) or you can contact us and let us help you develop your own customized training needs.

THE BEST PART IS...

All of these professional development and training opportunities will conveniently be brought to your site/office. (Minimum of 10 participants required).

Fees vary depending on location, participant number and specific course.

DON'T SEE A COURSE THAT WOULD BE OF VALUE TO YOUR TEAM?

We are always looking for ways to improve our educational offerings so that they are reflective of your needs. Simply tell us your challenge and let our team of dedicated and experienced professionals who work in the industry every day create a course solution specifically tailored to your needs.

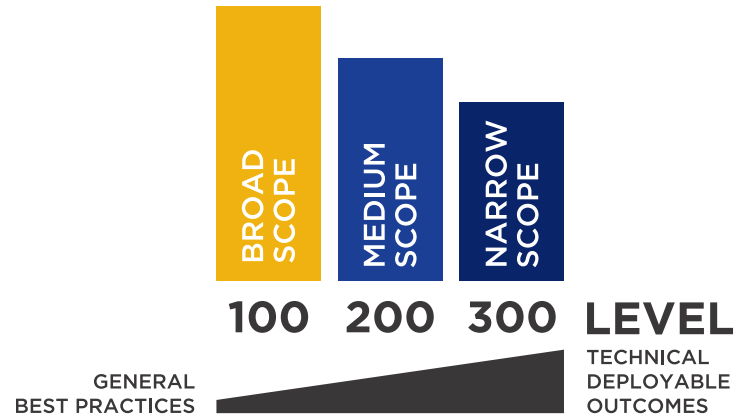

The founders of The Construction Institute of Canada shared a strong belief in the power of education and skills upgrading to elevate professionalism and ethical standards throughout the construction industry. To this end TCIC offers Gold Seal certified professional development courses for Canadian practitioners.

At TCIC, our knowledge is your edge when it comes to making sure you and your team have the latest facts, trends and information available in the construction marketplace.

UNDERSTANDING THE LEARNING PATHWAYS

Each construction stakeholder takes a different learning path completing a recommended number of Level 100, Level 200 and Level 300 courses. As a construction stakeholder completes their learning pathway, courses become narrower in scope and provide greater deployable technical skills and outcomes.

After completing each of the Stakeholder Levels (100, 200, 300), they will receive a TCIC Pathway Certificate indicating their level and total accumulated Gold Seal credits. After completing all three levels of a Stakeholder Learning Pathway, they will receive a TCIC Pathway Certificate of Completion, indicating the total Gold Seal credits achieved as part the learning pathway.
